

The Rhode Island Interscholastic League is excited once again to offer the **Operation Clean Competition Program** for the 2025-26 school year. Thanks to a grant from the Rhode Island Foundation, the RIIL has been providing the **Operation Clean Competition Program** to its member schools for 13 years!

What is Operation Clean Competition?

OCC is the RIIL's outreach and awareness program focused on informing Rhode Islanders about Appearance & Performance Enhancing Substances and Nutrition & Dietary Supplement Safety. We accomplish this through **FREE** educational programs. It is our goal to have all Rhode Islanders live informed!

The RIIL has partnered with the Taylor Hooton Foundation to bring these programs to middle schools, high schools, colleges and community organizations across the state, offering two valuable research-based educational programs:

- One centers on the issues of **Appearance and Performance Enhancing Substances and discusses many issues including Anabolic Steroids, HGH, and Dietary Supplements**, while exploring many of the issues and pressures our youth are facing both on and off the field.
- The other program focuses on **Nutrition and Dietary Supplement Safety**. The goal of this program is to educate on the realities of supplements, knowing what you are putting in your body, and making educated nutritional decisions. Both programs can be tailored to your audience's needs and time constraints.

Thanks to the Rhode Island Foundation, these programs are being offered at **NO COST TO YOU!**

For more information on **Operation Clean Competition**, please visit
